DETAILED ACTION

Drawings

The drawings were received on 10/04/2004. These drawings are not acceptable in that they are not formal drawing as required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 2 and 4-31 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-36 of U.S. Patent No. 6,652,450. Although the conflicting claims are not identical, they are not patentably distinct from each other because the differences are obvious modifications in the scope of the claims.

Claim 1 of '450' teaches a sling as claimed but includes a removable sheath. It is well settled that the elimination of an element and its corresponding function is within the ordinary skill of one in the arts. Therefore it would have been obvious to one of

ordinary skill in the art at the time the invention was made to eliminate the sheath and its function from claim 1 of '450' as an ordinary design expedient as describe above.

Claims 2-30 of '450' correspond directly to claims 2 and 4-31 of the instant application.

Response to Arguments

The suture –18- of Silvestrini and-11- Tihon do not provide a means for manual tightening or loosening along the sling as required by the claimed “means” language.

Applicant's arguments, see pages 10-13, filed 10/4/04, with respect to Silvestrini and Tihon have been fully considered and are persuasive. The rejections of claims 1, 2, 4-10, 13-17, 19-21 and 26-29 have been withdrawn.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
